

Joon Ki Hong

[Xjo0nn@gatech.edu](mailto:Xjo0nn@gatech.edu)

I worked on the homework assignment (HW0) alone, using only this semester's course materials

CS 1301 HW0

My name is Joon Ki Hong. I am currently a freshman in Georgia Tech majoring in Computer Science. I was born in Seoul, South Korea but immigrated over to the U.S when I was only 2 years old. I graduated from River Dell High School in Oradell, NJ although I currently reside in Fort Lee, NJ. I grew up not knowing what my future had in store and what motivations I had to excel. However, I found a passion for technology when I first pried open the dusty side panel of my old P4 Sony Vaio on a middle school night. I was fascinated and wanted to learn more about the complex circuitry that lay before me. I found that asking others did not facilitate my urge to learn. Therefore, I learned how to utilize Google and other various resources to learn about the computer and its functions. I learned about the different components (CPU,GPU,SB,NB) of a pc and even built my own pc. But I felt that that wasn't enough. I wanted to get down to the software portion that runs in harmony with the hardware. The infinite potential that computer languages had drove my second on-going passion to create applications that will change society for the better. In addition to all of this, I had a third and fourth passion: playing PC games (Steam ID: nj50jl SC2: xjo0nn@gmail.com) during the night and playing tennis during the day. I'm not your stereotypical techie. I love playing sports and socializing as much as I love technology. So here I am, in Georgia Tech, ready to take on challenges I will need to overcome in order to achieve my goals.
